

Bio-Nutrition International

Bio-Power 200

(Feed Grade)

fermented metabolites and other beneficial factors

Physical Characteristics

Color: light yellow

Taste: bland

Texture: dust-free, uniform powder

Packaging

20 kg poly-lined paper bag

Bulk tote bags

Product Description

Bio-Power 200 is an all-natural probiotic blend used as a feed additive to reduce incidents of disease and mortality and improve animal performance. Providing 200 CFU per gram of beneficial bacteria, Bio-Power 200 improves the host animal's intestinal microbial balance, stimulates appetite, increases animal feed intake and weight gain, and improves reproductive efficiency. Bio-Power 200 enhances the quality of egg-laying hens, and increases the milk yield of dairy cattle. By reducing ammonia gas concentration Bio-Power 200 safeguards the habitat against incidents of respiratory diseases.

Ingredient Composition

Bacillus subtilis, Lactobacillus, Saccharomyces cerevisiae, Bacillus bifidus,
